About Me

My main strengths?

I am a very quick learner who is passionate about becoming a frontend software engineer. I am great at using coding languages such as HTML and CSS. I have also recently learnt JAVASCRIPT and intend on learning REACT.

Skills I would like to improve during this apprenticeship?

In this apprenticeship I want to be able to develop and use my IT skills that I will learn to help me get further into this field. I really want to polish up on JAVASCRIPT as I have learnt it recently and I want to learn many other languages such as REACT and PYTHON.

My hobbies and interests?

I love going to the gym as I believe keeping fit and healthy is an important part of life. I love studying languages, the most recent language I learnt was Arabic. I love food as it allows me to explore the world with just the sense of taste. I love to travel as visiting different cultures and people amuses me. I have been to Turkey, Bosnia and Herzegovina, Pakistan, Spain and Saudi Arabia.

How I develop my coding skills in my own time?

I am currently finishing a course about frontend engineering that was made by David Bragg. In this course I learnt many languages and best practices to use when coding. I search up videos and look for helpful tutorials that allow me to progress in my coding journey.
